Dear John,

Re: Proposed Task II-5 "Optical Mechanical Properties  
of Rear Projector Light Sources"

Thank you for the copy of the final report of the [redacted]  
[redacted] "Projector Study." The report will be of  
considerable value if you decide to proceed with the  
proposed task. The data on lamp life will be directly  
applicable.

STAT

Using the generalized approach derived in the [redacted]  
[redacted] technical note "Generalized Condensing System"  
we may be able to obtain a theoretical estimate of the  
effect of lamp manufacturing tolerances on performance of  
a projection system. Since the [redacted] study was  
principally concerned with condenser optics, we may need  
to modify their approach somewhat in order to study the  
effect of lamp quality.
